FIREPLACES

Opti-Myst designer electric fireplaces

Design your very own bespoke electric fireplace

Master Fireplaces is the importer and distributor for the Dimplex Opti-Myst 3D smoke and flame effect fires.

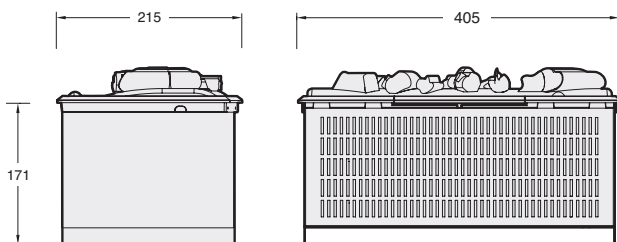

Dimplex from the UK are the world's leading electric fireplace company. Dimplex Opti-Myst is the most realistic electric fireplace on the market – why? Because only the Dimplex Opti-Myst uses a unique patented water-based technology to create a flame and smoke effect so real, so true, that you would think it is a real wood fire.

The Opti-Myst also incorporates a beautifully crafted moulded resin log-set with an ash bed that glows beautifully, as the flames lick and dance around the crafted log set. The beauty of Opti-Myst is that you can design your very own bespoke fireplace – design possibilities are endless.

We offer two sizes: The cassette 400 and the cassette 600, with our help, you can design your own bespoke electric fire using either of these two models.

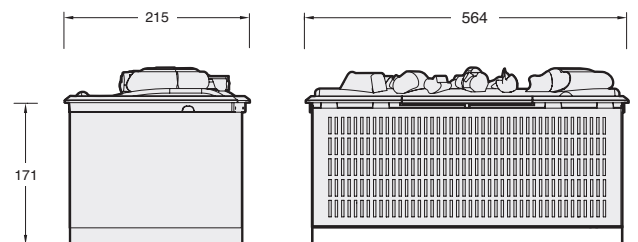

These are the two cassettes:

Cassette 400

Model:	Cassette 400
Width:	405mm (16")
Height:	171mm (7")
Depth:	215mm (8½")

Cassette 600

Model:	Cassette 600
Width:	564mm (22¼")
Height:	171mm (7")
Depth:	215mm (8½")

Here are just a few design options using the cassette 400.

Designing with one cassette 400 ▶

Designing with two cassettes – pebble option

Designing with three cassettes

Here are a just a few of the endless design options using the cassette 600.

As a rule, using only one cassette works best for the 600.
